On behalf of the Enarx Project

To:
Dave Thaler, Chair of the Technical Advisory Council
Of the Confidential Computing Consortium

Dear TAC,

The Enarx project would like to request funding towards buying a new server, which will help us in achieving an adequate infrastructure for the development of our open source software.

We are currently looking to acquire a PowerEdge T550 Tower Server with an Intel 5318S from Dell, with an estimated cost of under $ 7,500.

We appreciate your consideration.

Sincerely,

Nick Vidal
